

"Milan Rakic, there is so many things I want to tell about this guy, that I don't know from where to start...but for sure the most important is that he is my friend, and became a friend of mine is not an easy job at all, friendship are based in trust, respect, taking care each other, and the most important die in the field, and this is what this guy do for his clients, I have been working with his company **Aviation Resource Group** for 3 years, he help sold my 1<sup>st</sup> plane, a Lear60 (N582MM) and was worry how to deal with, because is always a mess when you sell a plane and when you start working with a new guys, and I have to say it was one of the smoothies and easy transaction ever.... After that, we start the new project on my Facon 900B (N1726M) and all I have to say is that Milan became my number one partner in crime, we enjoyed so much building that plane, from searching the best machine, choosing the best facilities and designed all, this guy is just AMAZING, every time I flight my plane the words that became to my mind are satisfaction and pleasure, he is doing all the post selling service of my plane, directing in one way with my pilots, and in one year of that service I have no complaints about him and his team, a 20/20 guy/company"
